FIRE & SECURITY SOLUTIONS

Protecting property and life
from fire, theft and vandalism

SCUTUM UK
Fire Protection | Security | Remote Monitoring

Scutum UK is a single-source provider of world class fire and security solutions, protecting the assets, property, staff and data of leading UK organisations for over 30 years. From our network of regional offices we have designed, installed, commissioned and maintained integrated systems at over 5000 sites across the UK. As part of the wider European Scutum Group we are a leader in fire and security solutions.

Experienced and Dedicated

From start to finish, our experienced team ensures we follow industry best practices and meet all relevant standards. We are dedicated to excellence and our staff receive extensive training on the latest technologies to ensure we offer our customers the best solutions to meet their individual needs.

Trusted and Accredited

Trust is earned by doing what we say we will, demanding care, consistency and competence, committing us to high ethical standards and is central to who and what we are. We deliver on our promises, meeting our customers' requirement for quality, delivery, responsiveness and reliability.

Testing our values is central to our business ethos and we engage in a programme of rigorous 3rd party accreditations:

FIRE PROTECTION

Modern, Intelligent Equipment

High performance, modern, intelligent, addressable control panels are at the heart of today's fire systems. From small, single-panel sites to large multi-node networks, with full graphic representation and PC front-end designed and supported in-house, we can give you a selection of EN54 compliant products to meet your needs.

Emergency Lighting

In the event of a power failure it is critical that key areas, corridors and emergency exits remain illuminated to allow safe egress. We provide a fully intelligent, unique, highly cost effective and environmentally friendly emergency lighting system which incorporates state of the art LED and battery technologies.

Audio and Visual Alarms

Alarms are an essential component to most fire systems and it is becoming increasingly important to provide a visual alarm (VADs), to complement the typical audio sounder alarm. We provide a full range of conventional or intelligent audio sounders and visual beacons, compliant with the new BS EN 54-23:2010 product standard.

Resilient and Versatile Detection

We offer a range of highly resilient and versatile detectors, suitable for use in any environment with IP67 rated options. Ranging from thermal to photoelectric sensors, available as either intelligent or conventional detectors, you can rest assured we have exactly the product to meet your needs.

Suppression Systems

Scutum UK offers a full range of fire suppression solutions for industrial, commercial and high hazard applications. From Inert to Synthetic Gas, Water Mist to Foam and Inert Foam systems, Scutum UK can deliver precise and effective solutions which are safe for people, critical assets and the environment.

Compliance

The Scutum UK Group provides specialist fire safety consultants giving practical, professional advice on all aspects of fire safety, fire engineering and design. We ensure legal compliance and that your people and assets are comprehensively protected. Fire safety management is a requirement under UK Fire Safety law.

COMPLETE SOLUTION
FIRE, SECURITY & HIGH HAZARD

FIRE

1. Fire & Gas Detection

Intelligent, addressable panels supporting site wide fire detection and alarm.

2. Fire Suppression

Inert, chemical and water based solutions designed to protect critical assets.

3. LED Emergency Lighting

High efficiency emergency LED lighting ensures a safe exit, in the event of a power failure.

SECURITY

4. Access Control

Control access using the latest reader technology, including a range of biometric solutions.

5. CCTV & VMS

High definition images 24x7, managed on the very latest Video Management Systems (VMS).

6. Perimeter

Early detection of unwanted intruders using leading edge analytics and devices.

7. Physical Security Information Management

A single front end to manage your entire site, including access, CCTV, intruder and fire.

HIGH HAZARD

8. Intrinsically Safe

Intrinsically safe detectors and alarms prevent electrical ignition in volatile hazardous areas.
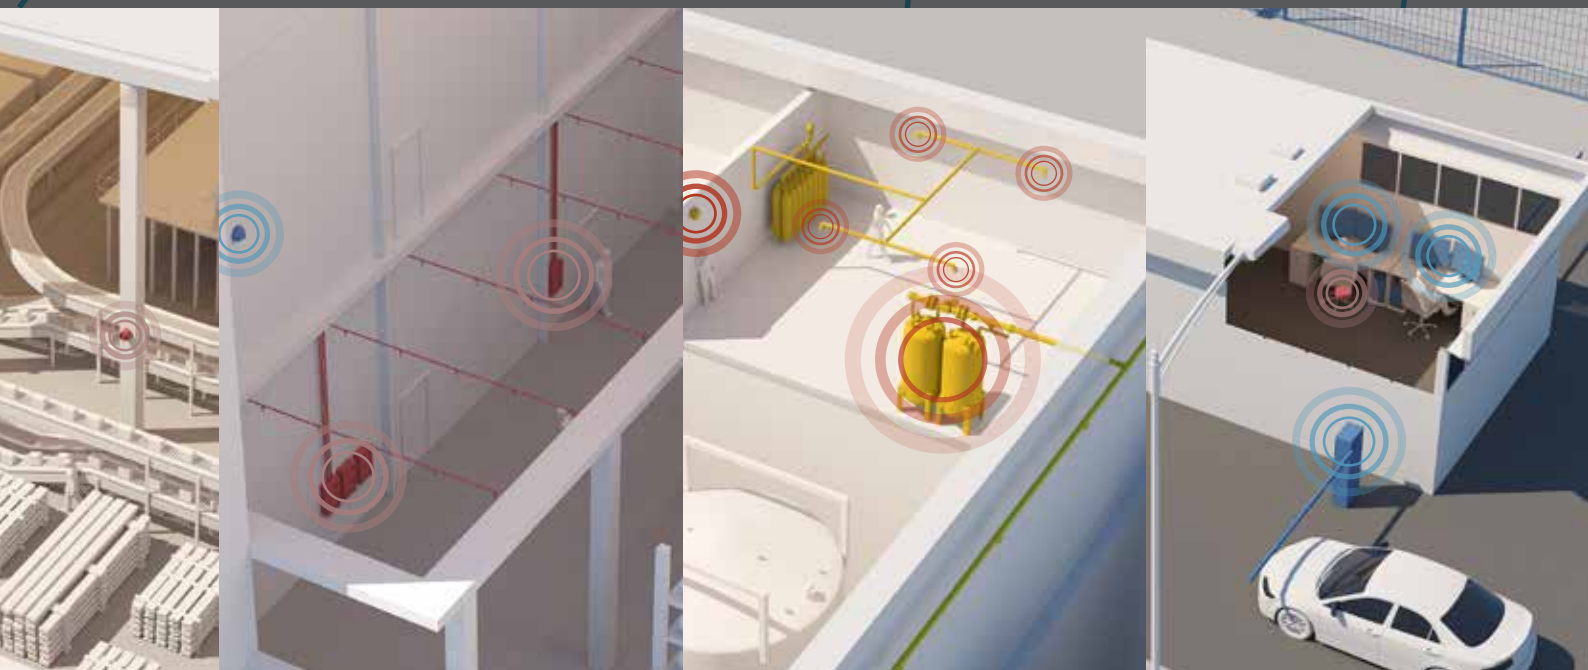

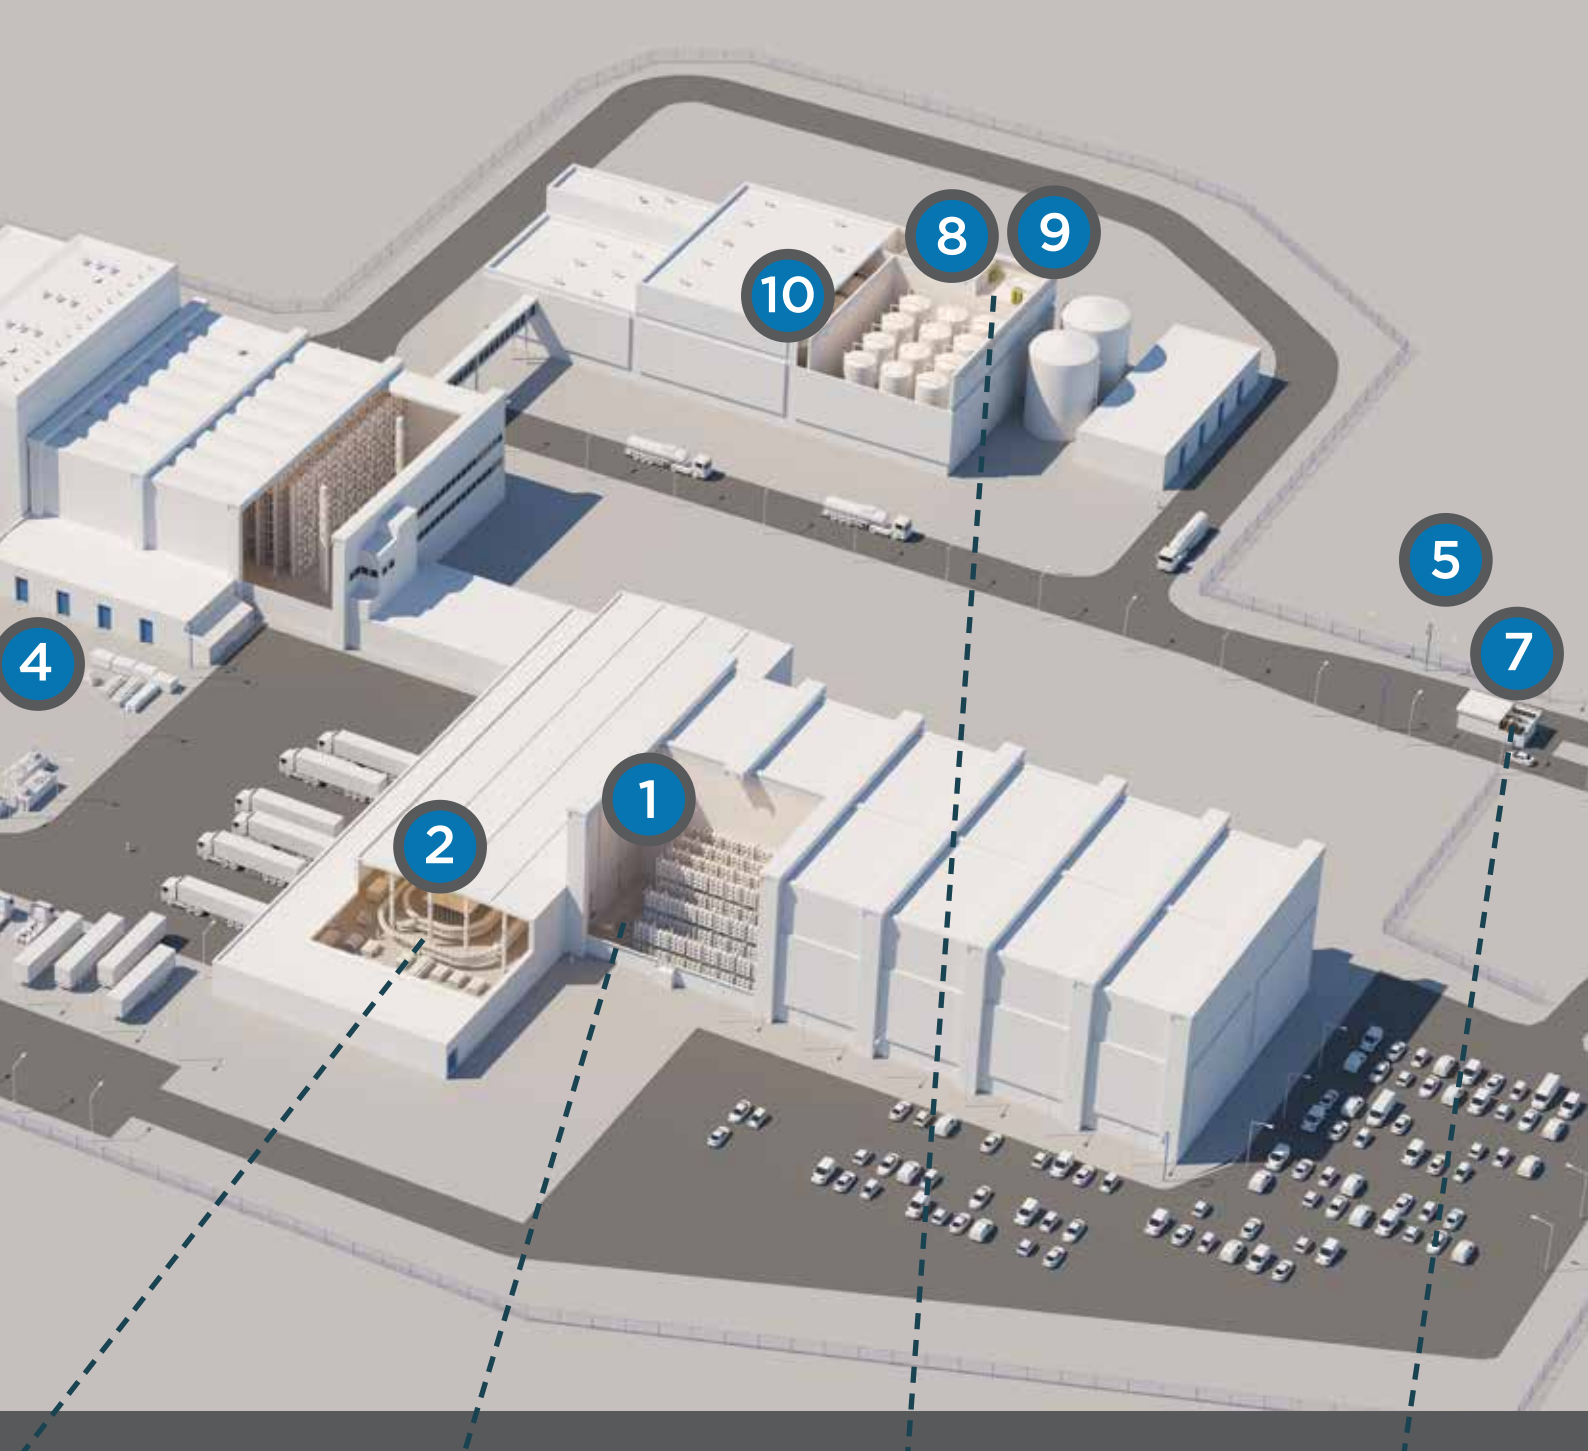

9. Water Deluge System

Water deluge systems protect severe fuel hazard areas with large open sprayers in the event of a fire.

10. Explosion Proof

Automatic and visual detection, ATEX certified to withstand hazardous and explosive atmospheres.

SECURITY

Access Control

If you are thinking about upgrading or need something new, we have some brilliant access control solutions to show you. Whether it's 10 or 500 doors over multiple sites, we can give a choice of systems which will surprise you through their advanced features, integration capabilities with other security systems and personnel databases.

HD CCTV and VMS

HD is fast becoming the standard choice, with a huge range of camera options to suit all budgets. Choosing the right Video Management System (VMS) to manage the playback and recording of your cameras can be very confusing and at Scutum UK we can present a choice of the best open architecture IP based platforms.

Perimeter Protection

We are specialists in Perimeter Intruder Detection systems (PID's). The technology now available to provide early intrusion detection at the edges of your site, is reliable and avoids false alarms. Thermal imaging cameras combined with advanced analytics, vibration and movement sensors around a fence line, are now affordable and easier to install.

Intruder Detection

Intruder alarms are undoubtedly one of the most effective and proven deterrents against criminal activity in the market today. We can offer comprehensive installation and maintenance services for all major alarm panels, including remote video monitoring.

Maintenance Services

We can offer tailor made short and long terms maintenance services for all your Fire and Security systems. Our track record for providing excellent customer service is a rarity in our industry and we take full responsibility for ensuring that we deliver when you need us most.

Innovation and Advice

We get a buzz from solving problems with innovative and exciting products. Most security installers are reluctant to propose these solutions because they lack the technical abilities to both sell and support them. We are happy to demonstrate the very latest and greatest technology to you.

HIGH HAZARD

Turnkey Solutions

The Scutum UK High Hazard Division provides complete turnkey solutions and services throughout the oil, gas and petrochemical industries. The Division's role is to provide project specific hazard analysis and development of optimized solutions. We manage everything from start to finish, meaning clients are removed from the need to coordinate with third party companies.

At the Cutting Edge

Within its business Scutum UK has considerable resources, being staffed by qualified, experienced personnel with a keen focus on customer care, ensures consistent delivery of a high quality service. Our experienced Engineers and Designers use the most up to date computer aided technology, applying it to systems throughout the Oil, Gas and Petrochemical industries on a number of diverse applications.

Design and Consultation

From conception Scutum UK supports the client's design and engineering teams, discussing their detailed requirements, offering views based on previous experience and knowledge of the hazards involved.

Established & Accredited

We are responsible for protecting people, property and critical assets in some of the most demanding and delicate installations across the UK. We stay at the forefront of safety standards and accreditations, as we have been doing for over two decades.

The Scutum Group

Scutum Group UK is part of the Scutum Group, a leading European and US independent player in safety and security, serving over 115,000 sites across Europe and the US. Scutum provides highly reliable, innovative and customised equipment and services for all industries.

Scutum Group UK Locations

Scutum Group UK operates nationally from offices throughout the UK; strategically positioned to support our customers, offer the best possible solutions to meet their needs and provide a national reach with a personal service.
