

Job Description:

Multi Skilled Fire and Security Systems Service Engineer

Location:

Devon and Cornwall

Salary for Multi Skilled Engineer Role:

- Salary depending on experience and ability
- Company Vehicle/Fuel Card
- PDA/Laptop/Mobile Phone
- Overtime and call outs
- Company Life Insurance
- Uniform provided
- Must have own hand and power tools

We are looking for a multi-disciplined (CCTV, intruder, access control and fire) engineer to carry out corrective and preventative maintenance on security systems.

Applicants must have a proven track record in the security sector - 5 years minimum is essential.

Duties of Multi Skilled Engineer:

- Servicing of systems at various sites across the south-west, predominantly commercial with some domestic. Although this is a service role the company withholds the right for the role to become installation orientated at any time.
- Ensure repairs and installations of systems are to a high standard.
- Meet clients and ensure a first class service delivery when on-site.
- Work to strict company / client deadlines.
- Ensure compliance with health and safety regulations

Successful applicants for the Multi Skilled Engineer role should meet the following criteria:

- Experience of CCTV, intruder, access control and fire systems installation, servicing and repair.
- Familiar with Texecom, HIK ,Advanced, Hochiki, Paxton, Grosvenor
- Be Familiar with Current Standards both EN and BS
- Experience of producing reports and completing paperwork accurately.
- Experience of working closely with clients and customers.
- The ability to work on your own and willingness to show initiative.
- Must be computer literate as you will be working with IP equipment.
- A full driving license is essential.

Full five year vetting to BS7858 will be carried out along with a DBS (CRB) check
