Innovation and expertise for all
your electronic security needs

SCUTUM UK

Fire Protection | Security | Remote Monitoring

Scutum UK is a single-source provider of world class fire and security solutions, protecting the assets, property, staff and data of leading UK organisations for over 30 years. From our network of regional offices we have designed, installed, commissioned and maintained integrated systems at over 5000 sites across the UK. As part of the wider European Scutum Group we are a leader in fire and security solutions.

Experienced and Dedicated

From start to finish, our experienced team ensures we follow industry best practices and meet all relevant standards. We are dedicated to excellence and our staff receive extensive training on the latest technologies to ensure we offer our customers the best solutions to meet their individual needs.

Trusted and Accredited

Trust is earned by doing what we say we will, demanding care, consistency and competence, committing us to high ethical standards and is central to who and what we are. We deliver on our promises, meeting our customers' requirement for quality, delivery, responsiveness and reliability.

Testing our values is central to our business ethos and we engage in a programme of rigorous 3rd party accreditations:

What we do

Scutum UK protects lives, property and assets and takes pride in the full management of all security and fire system projects. We design, supply, install and commission integrated fire and security systems as well as provide ongoing maintenance services.

Design

Our expert team designs systems with tomorrow's evolving threats in mind and manages all sizes of projects. All designs are compliant to relevant standards and design work takes place using the latest software in-house within purpose built facilities.

Supply

Our strong partner relationships ensure best-in-class products and systems that are tailored to meet the customer's needs and budgetary requirements. Our UK regional offices are strategically placed to support system roll-outs nationwide.

Install

Installation is carefully managed by highly skilled professionals. Every installation carried out by Scutum UK or on behalf of Scutum UK, through our relationships with professional installers and contractors, complies fully with current standards.

Commission

Our experienced commissioning team transition systems from an installed state to a fully active system in compliance with the relevant British or European Standards, with full documentation provided prior to hand over.

Test

Systems that protect life and property or provide evidence are relied on to be effective and at the ready when required. Our expert team makes sure that systems are tested at regular intervals and continue to meet required standards.

Maintain

As well as maintaining the systems we directly install we also protect existing networked or analogue systems, offering paths to upgrade, extend or modernise third-party systems and infrastructure, at a pace that works for the customer.

Our capabilities

Single-source provider

Scutum UK is a single-source provider for complete integrated fire, security and safety solutions. Our tailored solutions meet the demands of some of the UK's leading organisations.

Network infrastructure

As well as understanding the needs of an IP-based modern security system infrastructure, our knowledgeable team know how to make the most of existing infrastructure. Forward thinking design allows for seamless system upgrades in the future, at a pace to fit the customer's budgetary requirements.

Knowhow and experience

From start to finish, our experienced team ensures we follow the best practices in the industry and meet all relevant standards. Our staff receive extensive training on the latest technologies to ensure we offer our customers the best advice to meet their individual needs, in a world where criminal activity becomes ever more sophisticated.

UK wide, local support

Scutum UK operates nationally from offices in London, the Midlands, the North and Scotland, strategically positioned and fully equipped to support our customers, deal with issues quickly and offer the best possible solutions to meet their needs. We are proud of being able to provide and combine a national reach with a personal service.

24x7 Call Out Service

Our service team's 24x7 emergency response throughout the year, combined with our strategically positioned regional offices ensures that we are never far away and ready to quickly support our customers, deal with issues and guarantee peace of mind.

Diverse supply chain

Scutum UK has strong partner relationships with leading security systems manufacturers in order to provide best-in-class solutions through a diverse supply chain, ensuring that we install the most innovative security products and systems to meet the needs of our customers.

Future proof and scalable

We stay at the forefront of security technology to ensure that the systems we install are able to withstand tomorrow's evolving threats and have the flexibility to upgrade, evolve and extend across multiple sites, to adapt to the future needs of our customers.

Tailored solutions

There is no one size fits all security solution. Our tailor made, bespoke systems are designed to meet the individual needs of our customers, whether they are a large or small business across all market sectors throughout the UK.

Long term relationship

A commissioned system is only the beginning of a relationship with Scutum UK. Customers place their trust in us to deliver on our promises and our dedication to customer service has resulted in us forging strong ongoing relationships with large leading UK organisations, some of which span decades.

Innovative and integrated

We pride ourselves on solving problems with innovative and forward thinking products. From biometric readers to the latest in CCTV camera technology and video analytics, we are happy to demonstrate the very latest and greatest technology to our customers.

Our security solutions

IP-based access control

Whether a system upgrade or an entirely new system, we have a range of innovative solutions with advanced features and integration capabilities with intercom systems, other security systems and HR or IT personnel databases.

We are accredited installers for leading access control manufacturers. Older systems typically have an upgrade path that is cost effective while retaining much of the existing infrastructure, cards and readers. Our years of experience help our customers to plan a smooth transition without compromising security.

IP-based CCTV

HD CCTV is fast becoming the standard, with a huge range of camera options to suit all budgets and applications. We present a choice of the world's leading open architecture IP based platforms and Video Management Systems that are both scalable and reliable.

Transitioning to IP brings massive benefits such as viewing cameras from any PC on the network or even smartphones or tablets and does not necessarily require replacement of existing analogue cameras. New HD IP cameras can be added to work alongside a legacy investment.

PSIM and integration

Today's complex security challenges demand a smarter range of integrated security technologies to achieve maximum security effectiveness and ease of use. Fire risks, alarms, CCTV, access control, intruder detection and visitor management can all be managed and monitored within one integrated SMS, across multiple geographic locations.

Intruder detection

Intruder alarms are undoubtedly one of the most effective and proven deterrents against criminal activity on the market today. We offer comprehensive installation and maintenance services for all major alarm panels and can offer remote video monitoring.

We are specialists in Perimeter Intruder Detection systems (PID's). The technology provides early intrusion detection, is reliable and avoids false alarms. Thermal imaging cameras combined with advanced analytics, vibration and movement sensors around a fence line, are now affordable and easier to install.

Monitoring centres

As part of the Scutum UK Group our alarm systems have multiple communication paths to the Alarm Receiving Centre (ARC), provided by Yeoman Monitoring Services.

Manned guarding costs are reduced by enabling a third party ARC to receive intruder alarms from the site. The ARC is able to view live video, monitor fire alarm systems and give audible warnings to intruders, as well as contact the Police. Even if phone lines are down we can use GPRS, GSM and IP as a backup to alert our ARC.

Maintenance and service

We offer tailor made short and long terms maintenance services for all types of security systems. Our track record for providing excellent customer service is a rarity in our industry and we make sure the systems we maintain are assessed at regular intervals and continue to be as robust and reliable as the day they were commissioned.

The Scutum Group

Scutum Group UK is part of the Scutum Group, a leading European and US independent player in safety and security, serving over 380,000 sites across Europe and the US. Scutum provides highly reliable, innovative and customised equipment and services for all industries.

Scutum Group UK Locations
